

Light Socket Stringer

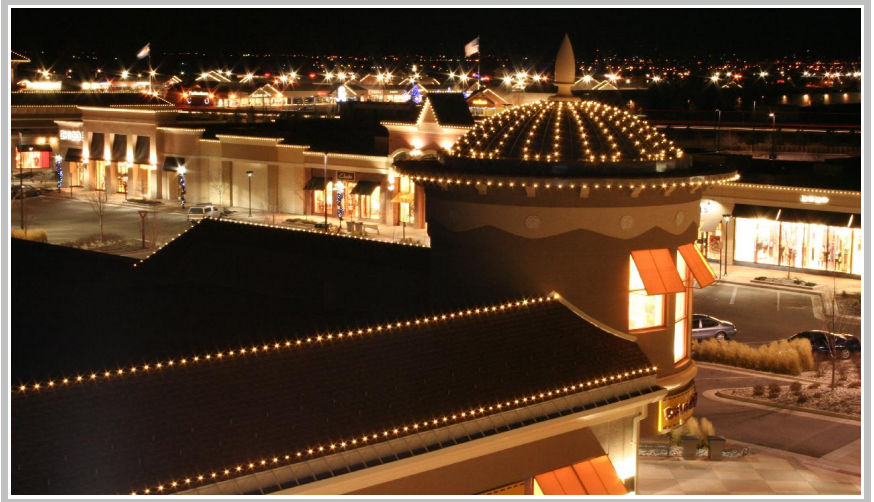

Commercial Grade

Add Decorative Lighting to Building Outlines, Patios, Gazebos. Create a Festive Interior in Tents and Pavilions.

Commercial grade light string adds festive lighting to interiors and exteriors including building outlines, patio lighting, gazebos and other decorative uses. Heavy-duty factory molded sockets on 14-gauge wire are durable and well suited for a variety of commercial applications where UL Listing is not required. Available in several wire colors, socket sizes and socket spacings.

Sockets are molded to seal around the base of the bulb, and protect the socket from moisture penetration.

Mount the string with the small rubber screw holes molded into each light string socket.

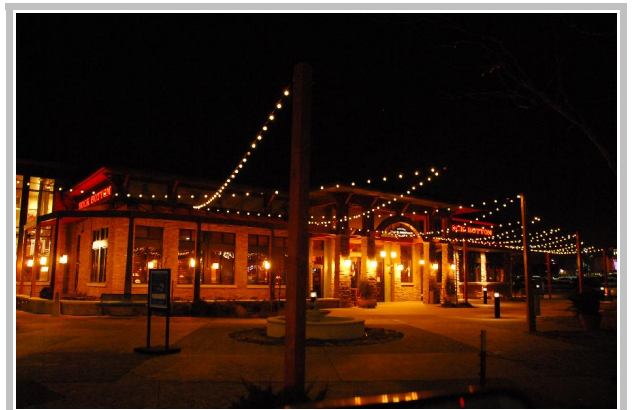

Features:

- Factory-molded sockets on 14-gauge wire is suitable for commercial applications (16-gauge for kits)
- Formulated PVC sockets form tight weatherproof seal around the bulb
- Long life, low maintenance linear lighting
- Available in bulk reels in candelabra, intermediate and medium base sockets
- Use with LED lamps to run full reel length and save up to 98% in energy costs over incandescent

Technical Specifications:

- Voltage : 120V, 60Hz AC operation
- Construction: Pre-assembled sockets with set spacing on 300V - 14AWG, SPT-2 wire
- Bulk Reels: 330 feet
- Wattage Maximum wattage per socket is as follows: MS = 25 watts, M = 25 watts, I = 10 watts, C = 10 watts
- Maximum run 1800 watts for bulk reels
- End Caps available to protect the cut end
- Packaging Bulk reel
